DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Suehiro et al. [US 2002/0001192 A1].

Regarding claim 1, Suehiro et al. discloses an LED mounting module for having LED devices which are to be mounted thereon, the LED mounting module comprising: a substrate [2, 2a, 6c1, 6b1] including at least one insulation board [2] made of an insulation material and a wiring pattern [6C1, 6B1] disposed to cover at least part of a main surface [2a] of the insulation board; and a reflecting member [4] made of resin material and having a reflecting hole [see figure 7B] in a position corresponding to each LED devices [3B] which is to be mounted on one of main surfaces [2a] of the substrate, wherein the reflecting member [4] has a lower surface part [above 6b1, 6c1] of which is directly adhered to part of the wiring pattern opposing the part of the lower surface, and

Art Unit: 2875

a remainder of which is directly adhered to part of the insulation board [2] opposing the remainder of the lower surface (figure 7B, paragraphs 0011, 0041, 0043, 0044, 0050, 0055 0068-0070).

Regarding claim 2, Suehiro et al. discloses a resin material forming the insulation board contains a same resin as the resin material forming the reflecting member (paragraph 0043, 0050).

Regarding claim 3, Suehiro et al. discloses the resin material is a thermosetting resin material principally containing an epoxy resin (paragraph 0043, 0050).

Regarding claim 4, Suehiro et al. discloses the wiring pattern [2a, 6b1, 6c1] is a surface pattern on which each LED device [3B] is to be mounted, and the surface pattern excluding an area corresponding to the reflecting hole is entirely covered with the reflecting member [4] (figure 7B).

Regarding claim 5, Suehiro et al. discloses the wiring pattern has another pattern [2c, 6B2, 12, 6C3] being not formed on the main surface [2a] of the insulation board, and a via hole [11, 10B, 9R] electrically connecting the other pattern and the surface pattern is formed within the insulation board in an area corresponding to the lower surface of the reflecting member [4] (figure 7B).

Response to Amendment

4. Applicant's amendments and arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection. A new reference, Suehiro et al. [US 2002/0001192 A1] is applied.
